

# Thermafiber® RainBarrier® Clip

## Description

Thermafiber® RainBarrier® Clip mechanically secures RainBarrier® continuous insulation (ci) to the exterior substrate of the building and is compatible with multiple types of masonry and façade tie systems. These clips are quick and easy to install on any jobsite and can be shipped overnight to the jobsite or in conjunction with Thermafiber® insulation material.

## Product Options

Available in cartons of 250.

## Installation

Insulation is friction fitted between the wall ties as shown.

After installing the insulation, secure with a RainBarrier® clip utilizing the center notches to secure directly on the wire tie as shown. Repeat process with the next horizontal row of RainBarrier® insulation.

If using a flange or flat style hanger, installation of insulation is friction fit between ties forming a seam (a typical size is 16" on center). After installing the insulation, secure with RainBarrier® clip as shown.

See Owens Corning publication "Thermafiber® RainBarrier® Insulation Installation Guide" (Pub. No. 10021141) for more information.

## Thermafiber Insolutions®

Thermafiber Insolutions® offers industry leading technical and engineering assistance to architects, specifiers, and contractors. These services include CAD drawings, engineering judgments, LEED® Credit Information, and product recommendations. Contact our technical services department at 1-888-834-2371 or email [ThermafiberInsolutions@owenscorning.com](mailto:ThermafiberInsolutions@owenscorning.com).
